

# TECH200PRO

The industry's first ALL-IN-ONE tire inspection tool, combining the testing and measurement of tread depth, TPMS and tire pressure in a single, easy-to-use tool.

The Tech200Pro has all of the rock-solid TPMS testing capabilities you've come to expect from a Bartec tool, combined with state-of-the-art tread depth measurement, and the ability to take 'stick pressure' as well.

All of this data is displayed and can be transmitted via wireless Bluetooth.

The Tech200Pro communicates with Bartec's TPMS Desktop!

Or can be configured to work with existing P.O.S systems.

## 3 TOOLS IN 1

Tread Depth Measuring

Tire Pressure Reading

TPMS Sensor Testing

## FEATURES

- ✓ High-resolution display
- ✓ Protective rubber boot
- ✓ Extremely accurate measuring systems
- ✓ Activates known TPMS sensors
- ✓ Bluetooth capable
- ✓ Integrated LED flashlight

## BENEFITS

- ✓ Easy to read, even in sunlight
- ✓ Made to survive in a rugged shop environment
- ✓ Pressure:  $\pm 1$ psi, Tread Depth  $\pm .004$ "
- ✓ Easily and accurately validate sensors
- ✓ Send tire and TPMS data to your computer
- ✓ Light up the workspace for faster service
