Technical Service Bulletin

General Information 

GI-11058-015

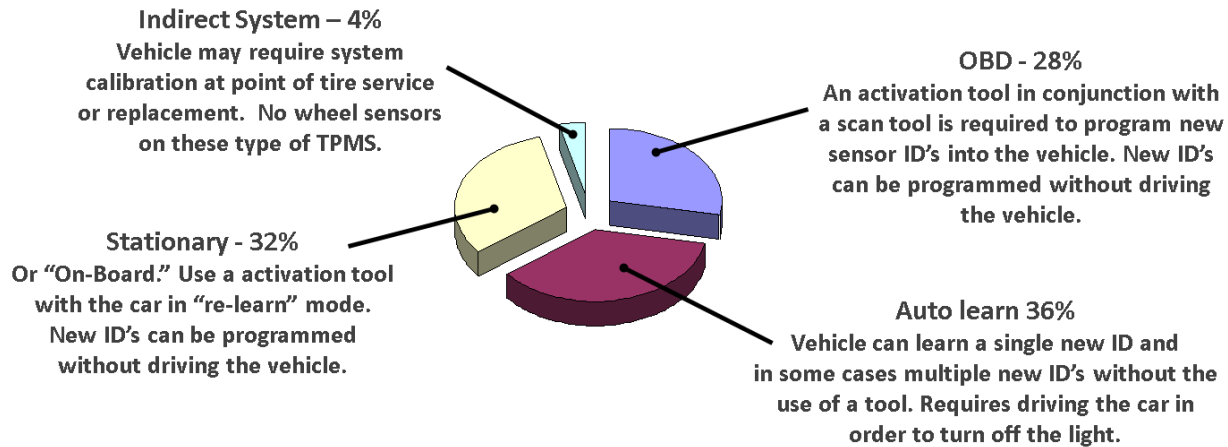

Applies To: Indirect Vehicles

Feb 9, 2015

OVERVIEW:

Bartec TPMS Tools are designed to work with DIRECT TPMS (Tire Pressure Sensors inside the Tire), however since the introduction of the Process Driven Menu System on the 400Plus, 400SD and 500, Bartec has integrated the INDIRECT TPMS Relearn Process right into the tool.

TYPES OF TPMS RELEARNS:

Bartec USA Technical Support: 866-407-8767

TPMS Technical Service Bulletin

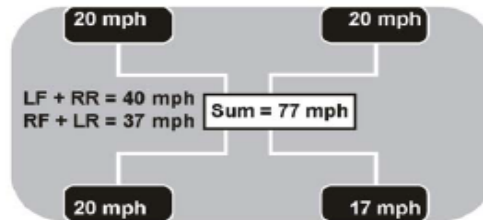

General Information 

GI-11058-015

INDIRECT TPMS:

Indirect TPMS: This system relies on the ABS Brake system and wheel speed sensors. There are no sensors in the wheels.

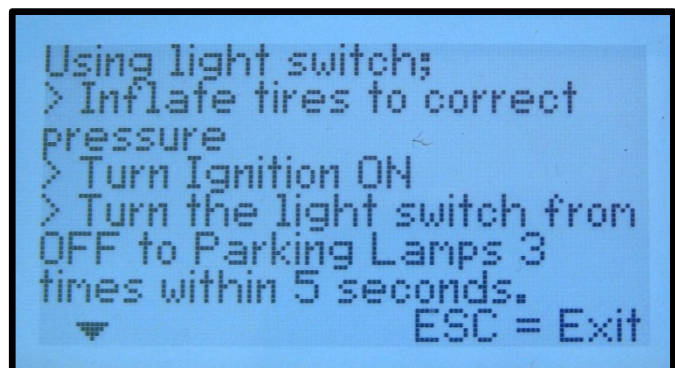

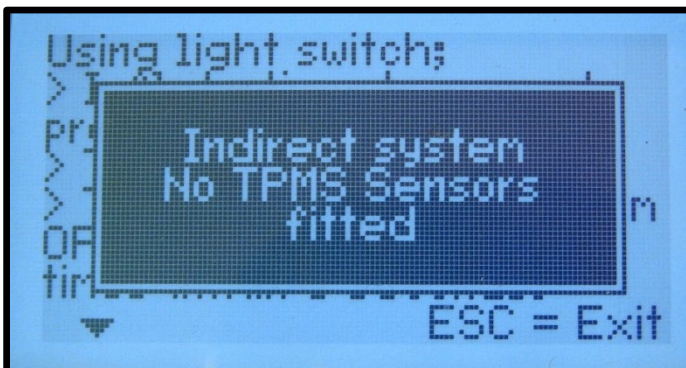

- As a tire or tires loose air pressure the rolling circumference is reduced and thus increases the wheel speed.
- The system compares all the wheel positions and will determine if a speed variance is present.

BARTEC TOOLS & INDIRECT:

The Bartec 400SD and 500 tools will indicate an INDIRECT Vehicle with on screen indication and display the Relearn Process to reset the TPMS light.
